

## **PRESENTS CRIT017**

**ARTIST: YOUNG AX**  
**TRACK TITLES: A: SOMETHING WONDERFUL**  
**AA: LISTEN UP!**  
**RELEASE DATE: AUGUST 2005**

After the unprecedented success of CRIT016: Calibre's sublime 'Domeron' backed with the mighty 'Maximus', Critical is proud to present the formidable talents of Berlin grown-Young AX. This creative producer's productions are not only known for being technically sound and full of ideas, but for having the ability to marry together complex structures with depth and emotion.

Consequently, his tracks have been lodged in the record boxes of award winning DJs: High Contrast, Nutone, Syncopix, Logistics and EZ Rollers ready to be showcased on various dancefloors worldwide.

**'Something Wonderful':** A piano-epic piece of drum and bass that is rich in beautifully organic sounds. Cosmic samples, quick paced hi-hats and soothing breakdowns all give way to bassed-up driven beats, complimented by lush vocals.

**'Listen Up':** Mellow, melodic synth hooks introduce an exciting mixture of sumptuous old skool sounds and subtle piano/double bass overtones. This track takes the old and mixes it with the new in an extraordinary way.
