Back like a Dutch whirlwind we welcome again the new school beat scientist Icicle.

His trademark stepping beats, sci fi samples and big bad bass are here in abundance.

Support has come from all sides of the scene: Friction, Logisitics, Cyantific, Nu Tone, Break and more have been exposing smart ears to the sound.

Theres lots to look forward to from us over the coming months, hot 12s from the likes of Lomax, Loxy and Sabre alongside the massive Vicious Circle.
